Dear Sir or Madam,

Thank you very much for helping me choose Workrise as a potential employer through talking with you in the events and fairs in Queen's University Belfast!

I first learned of this amazing opportunity through both in-person events and the QUB MyFuture platform. I am now pursuing this position of Placement Software Engineering Intern in Belfast for 2025. Please find attached my CV.

I am an excellent academic, having achieved a perfect GPA of 4.0 in both my first year of University and my A-Levels. I was the leader of a winning team in the QUB Sustainability Hackathon 2024. I am also highly qualified in communication, with a Grade 8 and additional Diploma in Speech and Drama.

I am extremely skilled with both JavaScript and SQL, shown through academics and frequent personal projects, keeping my skills sharp. I have an extremely developed knowledge of AGILE Methodologies in the real workplace through work experiences and group projects developed under AGILE. I have experience in the low-level architecture of computers, having achieved a 90% in a relevant module. I have also poured many hours into collaboration with friends to complete tricky programming challenges alongside creative and innovative personal projects, either for competitions or for fun and growth.

In the making of this application, I have gained a strong appreciation for Workrise. I am amazed by the scale of projects such as Workrise Vendor Management, your S2P solution which makes the entire Energy Industry more efficient while removing unnecessary complexity. I now feel steadfast in my belief that working in the gigantic Energy sector really gives frontrunners like Workrise the opportunity to truly make a lasting impact, with office achievements able to translate to the changing of real lives for the better.

Thank you very much for taking the time to review my CV.

I hope to meet you again in the next stages of the application process!

Yours faithfully,

Daniel Mackle.
