Dear Sir or Madam,

Thank you very much for helping me choose Perforce as a potential employer through talking with you in the events and fairs in Queen's University Belfast!

I first learned of this amazing opportunity through both in-person events and the QUB MyFuture platform. I am now pursuing this position of Placement Software Engineering Intern in Belfast for 2025. Please find attached my CV.

I am an excelling academic, having achieved a perfect GPA of 4.0 in both my first year of University and my A-Levels. I was the leader of a winning team in the QUB Sustainability Hackathon 2024. I am also highly qualified in communication, with a Grade 8 and additional Diploma in Speech and Drama.

I am extremely skilled with both JavaScript and SQL, shown through academics and frequent personal projects, keeping my skills sharp. I have an extremely developed knowledge of AGILE Methodologies in the real workplace through work experiences and group projects developed under AGILE. I have experience in the low-level architecture of computers, having achieved a 90% in a relevant module. I have also poured many hours into collaboration with friends to complete tricky programming challenges alongside creative and innovative personal projects, either for competitions or for fun and growth.

In the making of this application, I have gained a strong appreciation for Perforce. I am amazed by the scale and impact of projects that you have spearheaded, such as your trademark Helix Core software to give version control functionality to more than 7,172 companies. I am also amazed by the variety of your projects, like Helix DAM and JRebel. Your achievements in the CEDEC Awards has shown me your amazing technical skills and has inspired me to try my best so I can earn my chance at securing this amazing placement.

Thank you very much for taking the time to review my CV.

I hope to meet you again in the next stages of the application process!

Yours faithfully,

Daniel Mackle.
