### Dear Sir or Madam,

Thank you very much for helping me choose DailyPay as a potential employer through talking with yous in the events and fairs in Queen's University Belfast!

I first learned of this amazing opprotunity through both in-person events and the QUB MyFuture platform.  I am now pursuing this position of Placement Software Engineer in Belfast for 2025.  Please find attatched my CV.

*I am an excelling academic, having achieved a perfect GPA of 4.0 in both my first year of University and my A-Levels.  I was the leader of a winning team in the QUB Sustainability Hackathon 2024.  I am also highly qualified in communication, with a Grade 8 and additional Diploma in Speech and Drama.*

*I am extremely skilled with both Java, JavaScript (+ React) and TypeScript, shown through academics and frequent personal projects, keeping my skills sharp.  I have an extremely developed knowledge of AGILE Methodologies in the real workplace through work experiences and group projects developed under AGILE.  I have experience in the low-level architecture of computers, having achieved a 90% in a relevant module.  I was one of few competitors in the competitive Computer Science Challenges module, where I motivated myself to research, plan, market and develop a cutting-edge code product.*

*In the making of this application, I have gained a strong appreciation for DailyPay.  I was happily surprised to hear of your uniquely altrustic business ethos, which is all to rare nowadays. I researched DailyPay's Earned Wage Access Platform, investigating the niche that it fills, analysing the core benefits which support both the user and their company such as employee financial wellness, motivation and job retention. I firmly believe that working with DailyPay will help me improve my coding and soft skills and further my career.*

Thank you very much for taking the time to review my CV.
I hope to meet you again in the next stages of the application process!

Yours faithfully,

Daniel Mackle.
